

## AEC SPAN SPECIFICATION

# Plug & Play AEC for Rack to Rack Ethernet Applications

## 800G OSFP to 2\* 800G400G Q112

### Credo's ZeroFlap Family of HiWire™ SPAN Active Electrical Cable

A 800G AEC specifically designed for rack-to-rack connectivity, support up to 7 m reach, consume up to 50% less power than optical and take 75% less volume than DACs, and offer a 10-year service life.

With improved reach and signal integrity, these AECs deliver zero soft link flaps to support the lossless backend RDMA network that AI clusters are built on. With advances in liquid cooling, the 7 m length enables the full host to switch connectivity for leading GPU clusters.

### Credo's CAC8XXXX1A2B-C1-HW HiWire AEC

Designed to deliver highly reliable interconnect for artificial intelligence (AI) backend networks. It can sustain 2 \* 4-lanes of 100G PAM4 signal in each direction, providing bi-directional 800Gbps traffic per cable. The use and replacement of CAC8XXXX1A2B-C1-HW AEC is simple and straightforward as it adopts standard OSFP form factor and complies to MSA specifications.
